

Computer Based Training (CBT)

Flight Options offer over 20 specialised computer-based training (CBT) courses for candidates to refine their skills or add to their qualifications.

The Special Operations courses have been designed for initial or recurrent training, ensuring regulatory compliance. All courses are updated annually to ensure they are current and relevant. Each course includes high quality 2D/3D graphics, digital images, animations, on-screen text and audio narration.

Through its Learning Management System, Flight Options can create an account tailored to your individual requirements.

Upon successfully completing the course/s online exam/s Flight Options will issue you an electronic Certificate of Completion.

The CBT courses can be completed at the Flight Options Flight Training Centre or offsite at your own convenience. You can access your courses offline using the CrewPad apps for iPad.
